Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.
2. This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.
3. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.
4. Claims 1-4 and 18-24 are all drawn to a "fusion protein" as elected in the response of 16 July 2001. The claims, however, clearly encompass a vast number of different fusion proteins. Each different amino acid sequence of the claimed fusion proteins is considered to be a patentably distinct entity. Applicant is required to elect but a single amino acid sequence for the elected fusion protein.
5. Applicant is also requested to amend the claims such that they will only read on the elected fusion protein.
6. The inventions do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The claimed fusion proteins all have different amino acid sequences and as such constitute patentably distinct inventions.
7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).
8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 1634

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
